Add script no package

The screenshot shows the VS Code editor with the `package.json` file open. The `scripts` section has been updated to include `test:coverage` using Jest. The terminal shows the command `npm run test:coverage` being executed, which runs Jest with the `--coverage` flag. The output shows that all tests passed and provides a coverage report for the files `alerta.js` and `integracao.test.js`.

```
{
  "name": "inpe-alertas",
  "version": "1.0.0",
  "description": "Objetivo: app móvel para alertas de queimadas, inundações, desmatamento e relatos da população em tempo real.",
  "main": "index.js",
  "scripts": {
    "test": "jest",
    "test:coverage": "jest --coverage"
  },
  "repository": {
    "type": "git",
    "url": "git+https://github.com/Shynj0/inpe-alertas.git"
  },
  "keywords": [],
  "author": "",
  "license": "ISC",

Ex:2,3,4

fazer com que o GitHub Actions gere o relatório automaticamente em cada Pull Request para a branch `main` e envie o histórico para o Codecov.

The screenshot shows the VS Code editor with a GitHub Actions workflow file open. The workflow is configured to run tests with coverage on the `main` branch. The terminal shows the command `npm run test:coverage` being executed, which runs Jest with the `--coverage` flag. The output shows that all tests passed and provides a coverage report for the files `alerta.js` and `integracao.test.js`.

```
name: Relatório de Cobertura de Testes
on:
  pull_request:
    branches: [ main ]
jobs:
  coverage-report:
    runs-on: ubuntu-latest
    steps:
      - name: Clonar o repositório
        uses: actions/checkout@v4
      - name: Configurar o Node.js
        uses: actions/setup-node@v4
        with:
          node-version: '20'
      - name: Instalar dependências
        run: npm install --legacy-peer-deps
      - name: Executar cobertura de testes
        run: npm run test:coverage
      - name: Enviar Relatório para o Codecov
        uses: codecov/codecov-action@v4
        with:
          fail_ci_if_error: true
```

```
PS C:\Users\Joao Pedro\Documents\GitHub\inpe-alertas> npm run test:coverage

> inpe-alertas@1.0.0 test:coverage
> jest --coverage

(node:28488) Warning: '--localstorage-file' was provided without a valid path
(Use 'node --trace-warnings ...' to show where the warning was created)
PASS tests/mock.test.js

Ex5

README.md

Todos os testes passaram, apenas bloqueou o botão de merge pois pede para alguma outra pessoa analisar e aceitar. Mas os testes funcionaram como esperado
